**TILE
SPACE**

Distributed by Tile Space, stocked products are featured on our website, all other products are available on indent.

Company profile

RAK Ceramics is one of the world's leading manufacturers of high quality ceramic and porcelain tiles, sanitaryware and fireclay kitchen sinks. The company can be considered unique in its ability to create excellent quality products to the very latest fashion designs using the most advanced technical processes available worldwide.

The main headquarters and manufacturing plant for RAK Ceramics is situated in Ras-Al-Khaimah in the Arab Emirates. Established in 1991, the company has grown at an astonishing rate, now occupying an ever-expanding site in excess of 2 million m² and producing 3.5 million pieces of sanitaryware per annum.

RAK Ceramics exports to 135 countries worldwide and has other manufacturing plants in China, Bangladesh, India and Sudan to satisfy the demands of these local markets, with global production of tiles over 325,000 m² per day.

The company operates an accredited quality management system that serves as a framework for managing its operations, including continuous compliance, for its manufacturing and products, with ISO9001:2000.

Tile information

Whether you need wall or floor tiles, for indoor or outdoor use, we offer an extensive range of ceramic and porcelain tiles in various finishes, colours and sizes, complemented with decorative elements such as mosaics, dados and skirtings. Our premium quality products are extensively specified in leading projects throughout the world.

Ceramic tiles are a mixture of clays that are pressed into shape and fired at high temperatures. The colour of the body of the ceramic tile will depend on whether a red or white clay has been used, but this does not affect the quality of the tile.

Porcelain tiles are composed of fine porcelain clays and are fired at much higher temperatures than ceramic tiles. This makes them denser and more durable, as well as being less prone to moisture and stain absorption. Most porcelain tiles are suitable for indoor or outdoor use.

Full body porcelain tiles carry the colour and pattern throughout the entire thickness of the tile which means they do not show the effects of heavy traffic and are therefore suitable for almost any application, from residential to the heaviest commercial traffic or industrial applications.

With glazed porcelain tiles a liquid glass is applied to the body of the tile and fired at high temperatures. The glazing becomes hard and non-porous, resulting in a finish that is stain, scratch and slip resistant, easy to clean and won't fade with prolonged exposure to light.

A rectified tile means that all its sides have been mechanically finished (usually with precision saws and grinders) to achieve more consistent dimensions. This means the tile has less tolerance in size variations than normal porcelain tiles. Some of our ranges that are available as rectified tiles include: Lounge, Earth Stone and Oxodium.

With all tiles (whether ceramic or porcelain), a certain degree of shade and size variation is inherent after they have been fired, thus we recommend that sufficient tiles are ordered from the same batch to provide as much consistency as possible.

If you would like more information about any of our tile ranges, please contact us.

CLEANING AND MAINTENANCE

For Porcelain Floor and Wall Tiles

During installation

Do not allow any tile adhesive or excess grout to dry on the surface of the tile. Unwanted adhesive or excess grout should be cleaned a few minutes after application or before the material becomes dry. Cleaning should be performed according to tile adhesive or grout manufacturer's method and instruction. Tile adhesive or excess grout, if left to dry on the surface, should be removed with LTP Grout Stain Remover. For protection against construction dirt, scratches and accidental damage, the tiles already laid or fixed on the floors must be covered for the duration of the construction. Surfaces must be completely dry before covering.

For regular cleaning and maintenance

Wipe off dust from the tile surface on a regular basis. Dilute 1 part LTP Waxwash floor cleaner to 10 parts water. Apply and wipe over the surface with a cotton cloth, sponge or mop. Rinsing is not necessary. For floors, allow the cleaned area to dry before allowing pedestrian access. (Polished surfaces should be buffed dry with a soft cloth or machine after washing).

For cleaning with a floor washing machine

Wipe dust from the surface. Dilute 1 part LTP Power Stripper cleaning degreasing agent with 10 parts water. This can be put through a machine or applied to the surface with a cotton cloth, sponge or mop and thin scrub with the machine. For walls wipe surfaces down with the solution to release the dirt and grime, rinse and leave to dry before allowing pedestrian access.

For removal of stubborn marks or stains

Wipe off dust from the tile surface. Dilute 1 part LTP Grimex intensive cleaner with 3 parts water. If necessary, use straight from the bottle. Spread the solution over the affected area and leave for up to 15 minutes to allow the solution to release the dirt from the surface. Agitate with an emulsifying pad or stiff brush. Rinse well with plenty of clean fresh water. For floors, allow the cleaned area to dry before allowing pedestrian access.

Important

Cleaning and maintenance depends on the density of traffic, the condition of the surrounding area where the tiles are installed, and the nature of dirt to which the floors or walls are exposed. Routine cleaning and maintenance must be undertaken according to specific requirements. Any spillage of tea, coffee, paint, permanent marker, hair dye, nail polish and the like on tiles must be immediately cleaned to prevent severe staining. It is possible that these substances may leave light marks or slight discolouration on the tiles if left untreated for any period of time. It is not advisable to use hydrofluoric acid solution or its compound for cleaning. Do not use metal tools to scrape the dirt from the surface of the tiles.

CARE AND CLEANING

Cleaners

LTP GRIMEX

The answer to stubborn grime, old layers of wax or acrylic and even rubber sole marks on terracotta and natural stone flooring. Suitable for use on glazed and unglazed tiles, this product is excellent for renovating old quarry tiles, glazed ceramic, porcelain, terracotta, slate, stone, marble and stone fireplaces.

1ltr

5ltr

LTP POWER STRIPPER

One of the few products on the market capable of breaking down oxidised boiled linseed oil from the surface of terracotta. Powerful amines, ammonia and alkalinity penetrate and help lift the hardest, heaviest films, it is ideal for intensive cleaning of heavily contaminated vitrified quarry tiles, limestone, travertine, sandstone, slate, glazed ceramics and porcelain. Strips most things first time thereby minimising labour costs.

1ltr

5ltr

Sealers

LTP MPG SEALER

A colourless impregnating sealer formulated for use on tiles that have been mechanically polished to create a highly polished finish. Ideal for use on marble, porcelain, granite, limestone and slate surfaces that have a polished finish, particularly granite worktops. Suitable for both wall and floor surfaces it strongly protects against water, oil, grease and dirt. Suitable for interior and exterior use.

500ml

1ltr

5ltr

LTP GROUT & TILE PROTECTOR

Easy to apply. Forms a colourless barrier that helps to protect porous wall and floor grout joints from penetration by water, dirt, oil, grease and limescale. Assists cleaning. Ideal for use in wet rooms and shower enclosures. Used as a 'top up coat' this product further protects natural stone and all other types of masonry surface. Over spray on most surfaces will completely dissipate leaving no hard to remove residue.

600ml

Maintenance

LTP WAXWASH

Specially formulated for use on glazed and unglazed ceramic and porcelain tiles. Ideal for travertine, stone, terracotta, slate and quarry tiles. The gentle cleaning action of this product makes it ideal for washing unsealed floors and those sealed with LTP Mattstone, LTP Colour Intensifier, LTP MPG Sealer or LTP Wax. This liquid soap needs no rinsing after use.

1ltr

5ltr

If in doubt about using any of the above products, contact LTP Help line 0044 (0)1823 666213 for further advice before proceeding.

Technical Specifications

Technical Specification Glazed Porcelain up to 60mm x 60mm size.
